核对同年度合并净利润与经营现金净额的差异，查找原件依据和支持、反向解释，列出尚未取得的期后回款与存货资料。

 Review framework

Questions, sources and gaps

▼

Review questions and evidence gaps for this record; consult the research process for actual retrieval and review.

Selected entity 核查框架验收夹具股份有限公司（合成示例） · 300893

Research goal 核对同年度合并净利润与经营现金净额的差异，查找原件依据和支持、反向解释，列出尚未取得的期后回款与存货资料。

Evidence scope Financial comparison requires: 2025 annual period · Consolidated statements · CNY
Keep public web fields, retrieved disclosure excerpts and adopted originals separate; web data does not automatically become confirmed original evidence.
Historical statements do not establish currently available cash, actual performance or payment safety; specific conditions require direct evidence.

Source 10/01/2026, 10:00
snapshot

Review questions

1. Does the evidence belong to the selected entity?

Basis available

Entity identifiers are recorded; they do not establish the relationship between a brand, outlet, contracting party and payment recipient.

Evidence needed: Original entity records and contracting/payment-recipient relationship evidence.
2. Can this year’ s profit and operating cash be compared on the same basis?

Basis available

Comparable amounts are available; their causes still require original and operating evidence.

Evidence needed: Same-year consolidated originals, cash-flow supplements and records supporting the explanation.
3. Are operating changes observed facts, plans or inferences?

Basis available

Adjacent annual fields can be compared; balance changes alone do not establish causes.

Evidence needed: Original disclosures, actual orders, subsequent sales and collections.

4. Have material disclosure clues been checked against originals?

Insufficient evidence

This snapshot has no verifiable retrieved disclosure excerpt; headlines remain clues.

Evidence needed: Relevant original disclosures, page references and full context.

5. Which competing explanation or new evidence would change the judgment?

Clues to verify

The source-bound report conditions below are retained; they are conditions to test, not future facts.

Evidence needed: Supporting and contrary originals, plus direct evidence distinguishing the explanations.

Source coverage in this snapshot

Evidence	Saved items	Retrieved excerpts	Use limits
Selected-year web financials	1	Web fields	Retain the web-field scope; originals require separate adoption.
Disclosures and excerpts	0	0	Retrieved counts refer to saved excerpts, not full documents.
Media items and excerpts	0	0	Reposts do not provide independent confirmation; reporting still requires verification.
Public posts and excerpts	0	0	Unverified opinions in the current sample, not the views of all people.

Source attempt records 0 • Retrieval failed 0. Item counts are neither independent evidence-chain counts nor confidence probabilities.

Requirements for a supported judgment

- Verify the entity, annual period, consolidated scope and currency; missing or conflicting fields pause dependent comparisons.
- Trace key judgments to amounts, formulas or retrieved sources; retain the limits of headlines and media opinions.
- Keep the basis for supporting and competing explanations separate, with missing materials and incomplete steps visible.

Direct evidence to verify

These materials are needed for review; this public research does not establish that they have been obtained. Check the entity, period and scope before use.

- Subsequent collections, receivable aging and related contracts: distinguish settlement timing from persistent noncollection.

- Inventory mix, aging, impairment and subsequent sales: distinguish normal stocking from sell-through pressure.
- Restricted funds, debt maturities and actual repayment arrangements: verify currently available funds and obligations.
- The contracting-party/payment-recipient relationship, performance and refund terms: provide direct evidence for specific payment conditions.

Change conditions in the report

Evidence snapshot: 10/01/2026, 10:00

Subsequent collections and aging evidence may change the explanation (synthetic acceptance copy).
